

I HAVE A FRIEND OR FAMILY MEMBER THAT DOES SOLAR SO I'M NOT INTERESTED

As an established solar company here in Arizona for many years we have found that it is **always a good idea** for anybody interested in solar to get at least two bids for this major home improvement.

Why not just go with one bid, the one you have ?

Solar is a major investment typically in excess of \$15,000 and if financed or leased, a 25-year commitment. All companies that quote solar, have a baseline as to what they have to charge to make a fair profit. **So going with a friend or family member who does solar, we have found doesn't always yield the savings expected.**

In determining the right system for your needs many factors directly affect the price: cost solar panels, wattage output of panels, mounting hardware, electrical conduit and wiring, DC to AC inverter, roof inspection & permit costs, design blueprint, employee costs, facilities and offices. With so many factors bids can vary greatly.

Our professional analysis provides you a top-quality system fully warranted bump to bumper for 25-years. We never take shortcuts just to make a "buck".

Our experience with "friend or family member discounts" is that the difference between our price and these is always worth looking into. Best that it is free - costs you nothing to find out.

After thoroughly analyzing your energy requirements we present you with a super- detailed Solar Savings Report in a private Discovery Meeting at your convenience.

We truly believe after thinking this through you'll see that multiple bids will give you peace of mind. Finally, you have information to make the decision which fits the best.
