BBB Rating: A+

AGE IS SIMPLY NOT A BARRIER

**I am too old and don't want to change anything
Whether 55, 60, 70, 80, 90 or our oldest customer who is 103**

CHANGE CAN BE GOOD

Your age is simply not a barrier, our programs are designed to put a system on your roof no hassles or stress. Our \$0 Program: no upfront money is ever required, as it is partially subsidized by the U.S. government's 2022 Inflation Reduction Act. Solar is a smart & sensible investment that saves you \$\$ every month.

Once simple paperwork is signed in the convenience of your home, we take care of everything the same way a general contractor does. We take care of all the details.

We obtain necessary permits from APS and the city and county. You do nothing and can relax. In an average of 2-3 months your system is up and generating electricity. After permits are issued by the city or county, we install the system in one day, causing no interruption to your daily routine. Your new system is up in an average of 30-60 days from the date of signing, saving you \$\$ every month.

Your solar bill is average 25% to 40% less than you are now paying each month to APS, payment is fixed with a predictable payment. 16+ charges are reduced and in many cases eliminated. Cool!

All solar equipment is warranted for 25 years with no deductibles. Should service ever be needed, we do it quickly for nothing out of pocket. We use made-in-the-USA solar panels, batteries and equipment. Keeping money \$\$ in our country. Roof warranty is 5-25 years \$500,000.

Important. You are on an endless contract with your electric utility. We have been programmed our whole lives to automatically and mindlessly pay this bill every month. **APS bills and you pay regardless of the cost.** Being in APS Equal Pay program, merely spreads out high cost electric payments but DOES NOT REDUCE costs. Most critical is that it doesn't stop the yearly rate increases from impacting your finances.

At our no pressure meeting, we to show you with facts and figures that solar is unequivocally sensible. Switching to solar you escape high-cost utility electricity get off the rate-hike ladder. In exchange, you now have freedom to use electricity at the time and in the way you want, especially during the peak times!
