BBB Rating: A+

SPECIALISTS IN THE HIGH-END & LUXURY HOME MARKET

We have trademarked the system we call 'Sensible Solar' which creates cutting edge systems that incorporate just the right amount of solar vs. cost. Through our sophisticated rate & usage analysis we create the best solar system for maximum short and long term savings.

Going 'green' benefits our environment and importantly shields you from power outages.

Our experience includes homes ranging from \$500,000 to \$10,000,000. When you entrust us with your house, we go above and above. Roofs are a primary focus, and we provide a 5-25 year \$500,000 warranty. As home prices rise, square footage generally is much larger from 2500 to 10,000 sq. ft. or more. Our 'Best in the World' design solves energy demands with an elite system for total year round comfort.

Larger homes have a significantly higher return on investment (ROI) compared to modest homes under 2000 sq feet. With yearly utility bills \$4000-10,000/mo. we verify with spreadsheets an exceptional ROI. According to Zillow™ and other national studies, solar panels significantly boost your equity value.

Simply said, solar energy is far cheaper than utility energy, generally, 25-40% cheaper per kilowatt hour. On homes with high utility bills, this equates to multiple thousands of dollars saved in a relatively short period of years. Why continue to give your money to a utility mindlessly? This expenditure offers nothing in return, purchase or financing gains ownership and makes economic sense.

A solar lease where we own the system and you only pay for the electricity is way better than continuing to buy 'rent' utility energy. Leasing many times is 'sensible'. Too good to be true? No, good because it is true.

We use an exclusive 12-48-point analysis of your energy consumption, lifestyle, and future demands to develop a thorough action plan, a sensible plan that saves you money every month for decades. We develop your system using cutting-edge Tesla™, Enphase™ & Solar Edge™ battery technology for on & off-grid applications; allowing for EV charging plus plenty of energy to future proof for additions, remodeling, etc...

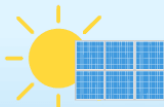

In our private in-home meeting we present a customized Solar Savings Report and answer any questions you may have. We urge you to schedule as it is absolutely free to find out. We are locally based committed to provide you with the greatest product and service in the business, as well as ensuring that you are well-informed before making a decision. We have earned 4-5 stars on all major review platforms.

You are more than simply another 'Sale'; a valuable client always treated with friendliness and professionalism.

WHO & WHY SENSIBLE SOLAR ?

- 1 Experience.** We feature some of the top award-winning energy experts in the nation. We local design our installation team has tens of thousands of custom systems on homes just like yours!
- 2 Savings.** Because we broker the best energy deal for you, we can offer the excellent pricing.
