OUR SOLAR DESIGN PLATFORMS ARE GO FOR LAUNCH!

We create amazing solar systems for our customers with the best systems in the world

Superior features. Enhanced designs. Wildly accurate our Design Program

The New Standards of Solar Proposal & Quote Technology

Solar Design Accuracy, Revolutionized

Discover—an upgrade to everything - quantum leap for quotes, production estimates, proposal accuracy, and overall stability and reliability.

Solar Design Accuracy, Revolutionized

Aurora represents the pinnacle of solar proposal technology, blending advanced machine learning, 3D modeling, and comprehensive simulation tools. It elevates every step of the solar design process, from initial imagery retrieval to final panel placement, ensuring unmatched precision and efficiency more than just an upgrade; it's a complete reimagining of solar proposal capabilities.

Enhanced Design Tools and More Robust Insights

With features like per-panel shading analysis, advanced tree modeling, and automated roof measurements leverages real-time data and state-of-the-art imaging to deliver proposals that are not only precise but also tailored to each site's unique environmental conditions. These systems simplify complex design decisions, making solar more accessible and effective.

Leading Solar Energy Innovation

Aurora is at the forefront of solar technology, setting new industry standards with its robust auditing and simulation capabilities. Its comprehensive approach includes a proprietary Solar Audit Tool and rigorous DNV auditing, establishing a new benchmark for proposal accuracy and reliability; are committed to spearheading the future of solar with solutions that anticipate the needs and exceed the expectations of both industry professionals and homeowners.

Comprehensive DNV Auditing

Gemini completed an exhaustive 2,600-home DNV audit, surpassing all industry standards for testing and validation.

Per Panel Shading and Production

Harness every ray of sunlight maximizing each panel's potential with per panel shading and TSRF data.

Revamp Landscapes with Advanced Tree Modeling

Easily correct outdated satellite imagery with advanced tree modeling tools.

Enhanced Roof Measurements

Customizable AHJ-supplied fire setbacks and unparalleled roof measurements using the latest imaging technology.

Smart Stringing

Maximize energy production by actively optimizing the electrical connectivity between panels without any effort.

Proprietary Solar Audit Tool

Our Solar Audit Tool allows for extensive simulation and fine-tuning, setting new standard in production modeling.

Superior Imagery, Shading, and Coverage

Leverage high-definition imagery for hyper-accurate shading and sun exposure analysis.
